

At Risk Children in Ukraine

A 2014 UNICEF report on the most-at-risk adolescents in Ukraine estimated the number of street-based adolescents at 90,000

A 2010 survey in Odessa Ukraine found that 18 per cent of children in street situations in the city were living with HIV

7 percent of boys reported having had sex with men

22 percent of the street children had injected drugs

10 percent will commit suicide before their 18th birthday

66 percent of girls provided commercial sex services or "sex for reward"

70 percent of boys on the streets turn to crime and end up in prison

90 percent of the children living on the streets have been abused

80 percent of the children on the street drink alcohol
